1. Record Nr. UNINA9910810853003321

Autore	Schwed Amy
Titolo	Brain-friendly study strategies, grades 2-8 : how teachers can help students learn / / Amy Schwed, Janice Melichar-Utter ; acquisitions editor Faye Zucker ; cover designer Lisa Miller
Pubbl/distr/stampa	Thousand Oaks, California : , : Corwin Press, , 2008 ©2008
ISBN	1-4522-9763-0
Descrizione fisica	1 online resource (208 p.)
Disciplina	372.13028/1
Soggetti	Study skills - Study and teaching (Elementary) Study skills - Study and teaching (Middle school) Brain
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	""Cover""; ""Contents""; ""A Guide to Study Strategy Activities in the Chapters, with Corresponding Grade Levels""; ""Acknowledgments""; ""About the Authors""; ""Introduction""; ""Chapter 1 - Introducing the Brain: Hooking Into Your Memory""; ""Overview""; ""Chapter 2 - Learning What Works for You""; ""Modalities and Styles Awareness""; ""Chapter 3 - Rethinking How We Learn""; ""Each Brain is Unique""; ""Chapter 4 - This Way to a Healthy Brain""; ""The All-Important a €œTIONSa€?""; ""Chapter 5 - Be-Boppina€? the Brain""; ""Musical Rhythmic Studying""; ""Chapter 6 - Talking Tightens Memory"" ""Walking down Verbal/Linguistic Lane""""""Chapter 7 - Pumping up Memory With Muscles""; ""Running on the Body/Kinesthetic Track""; ""Chapter 8 - Seeing Your Thoughts""; ""Sightseeing on the Visual/Spatial Route""; ""Chapter 9 - Organizing to Know""; ""Marching down Trails of Logic""; ""Chapter 10 - Learning Together""; ""Ita€?s More Than Just Me""; ""Chapter 11 - Timing is Everything""; ""Planning the Journey""; ""Chapter 12 - Thinking About How We Study""; ""Understanding the Path to Classroom Success""; ""Appendix""; ""References""; ""Index""
Sommario/riassunto	Presents creative, research-based study strategies covering all content

		areas and tailored to elementary and middle school students' individual learning styles, including auditory, visual, and kinesthetic modalities.
2.	Record Nr.	UNINA9910768175603321
	Titolo	Computer Algebra in Scientific Computing : 9th International Workshop, CASC 2006, Chisinau, Moldova, September 11-15, 2006, Proceedings / / edited by V.G. Ganzha, E.W. Mayr, E.V. Vorozhtsov
	Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2006
	ISBN	9783540451952 3540451951
	Edizione	[1st ed. 2006.]
	Descrizione fisica	1 online resource (XII, 314 p.)
	Collana	Theoretical Computer Science and General Issues, , 2512-2029 ; ; 4194
	Altri autori (Persone)	GanzhaV. G <1956-> (Victor Grigorevich) MayrErnst VorozhtsovE. V <1946-> (Evgenii Vasilevich)
	Disciplina	512.00285
	Soggetti	Computer science - Mathematics Computer programming Discrete mathematics Algorithms Symbolic and Algebraic Manipulation Programming Techniques Discrete Mathematics in Computer Science Mathematical Applications in Computer Science
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	International conference proceedings.
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	Comparison Maps for Relatively Free Resolutions -- A Symbolic-Numeric Approach for Solving the Eigenvalue Problem for the One-Dimensional Schrödinger Equation -- Reducing Computational Costs in the Basic Perturbation Lemma -- Solving Algorithmic Problems on Orders and Lattices by Relation Algebra and RelView -- Intervals, Syzygies, Numerical Gröbner Bases: A Mixed Study -- Application of Computer Algebra for Construction of Quasi-periodic Solutions for

Restricted Circular Planar Three Body Problem -- Efficient Preprocessing Methods for Quantifier Elimination -- Symbolic and Numerical Calculation of Transport Integrals for Some Organic Crystals -- On the Provably Tight Approximation of Optimal Meshing for Non-convex Regions -- Providing Modern Software Environments to Computer Algebra Systems -- The Instability of the Rhombus-Like Central Configurations in Newton 9-Body Problem -- Algorithmic Invariants for Alexander Modules -- Sudokus and Gröbner Bases: Not Only a Divertimento -- Simplicial Perturbation Techniques and Effective Homology -- Numerical Study of Stability Domains of Hamiltonian Equation Solutions -- Numeric-Symbolic Computations in the Study of Central Configurations in the Planar Newtonian Four-Body Problem -- A Symbolic-Numerical Algorithm for Solving the Eigenvalue Problem for a Hydrogen Atom in Magnetic Field -- On Decomposition of Tame Polynomials and Rational Functions -- Newton Polyhedra and an Oscillation Index of Oscillatory Integrals with Convex Phases -- Cellular Automata with Symmetric Local Rules -- Parallel Laplace Method with Assured Accuracy for Solutions of Differential Equations by Symbolic Computations -- On Connection Between Constructive Involutive Divisions and Monomial Orderings -- A Symbolic-Numeric Approach to Tube Modeling in CAD Systems.-Inequalities on Upper Bounds for Real Polynomial Roots -- New Domains for Applied Quantifier Elimination -- Algorithms for Symbolic Polynomials -- Testing Mersenne Primes with Elliptic Curves.

Sommario/riassunto

This volume contains revised versions of the papers submitted to the workshop by the participants and accepted by the program committee after a thorough reviewing process. The collection of papers included in the proceedings covers not only various expanding applications of computer algebra to scienti?c computing but also the computer algebra systems themselves and the CA algorithms. The eight earlier CASC conferences, CASC 1998, CASC 1999, CASC 2000, CASC 2001, CASC 2002, CASC 2003, CASC 2004, and CASC 2005 were held, - spectively, in St. Petersburg, Russia, in Munich, Germany, in Samarkand, Uzb-istan, in Konstanz, Germany, in Crimea, Ukraine, in Passau, Germany, in St. Petersburg, Russia, and in Kalamata, Greece, and they proved to be successful. It was E. A. Grebenikow (Computing Center of the Russian Academy of S- ences, Moscow) who drew our attention to the group of mathematicians and c- puter scientists at the Academy of Sciences of Moldova conducting research in the ?eld of computer algebra. We were impressed that this group not only is concerned with applications of CA methods to problems of scienti?c computing but also c- ries out research on the fundamental principles underlying the current computer algebra systems themselves, see also their papers in the present proceedings v- ume. It was therefore decided to organize the 9th workshop on Computer Algebra in Scienti?c Computing, CASC 2006, in Chi¸ sin? au, the capital of Moldova.
