

1. Record Nr.	UNINA9910768177703321
Titolo	Inductive Logic Programming : 14th International Conference, ILP 2004, Porto, Portugal, September 6-8, 2004, Proceedings / / edited by Rui Camacho, Ross King, Ashwin Srinivasan
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2004
ISBN	3-540-30109-7
Edizione	[1st ed. 2004.]
Descrizione fisica	1 online resource (IX, 358 p.)
Collana	Lecture Notes in Artificial Intelligence ; ; 3194
Classificazione	007.64
Disciplina	005.115
Soggetti	Software engineering Artificial intelligence Computer programming Logic, Symbolic and mathematical Software Engineering/Programming and Operating Systems Artificial Intelligence Programming Techniques Mathematical Logic and Formal Languages
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Invited Papers -- Automated Synthesis of Data Analysis Programs: Learning in Logic -- At the Interface of Inductive Logic Programming and Statistics -- From Promising to Profitable Applications of ILP: A Case Study in Drug Discovery -- Systems Biology: A New Challenge for ILP -- Scaling Up ILP: Experiences with Extracting Relations from Biomedical Text -- Research Papers -- Macro-Operators Revisited in Inductive Logic Programming -- Bottom-Up ILP Using Large Refinement Steps -- On the Effect of Caching in Recursive Theory Learning -- FOIL-D: Efficiently Scaling FOIL for Multi-relational Data Mining of Large Datasets -- Learning an Approximation to Inductive Logic Programming Clause Evaluation -- Learning Ensembles of First-Order Clauses for Recall-Precision Curves: A Case Study in Biomedical Information Extraction -- Automatic Induction of First-Order Logic Descriptors Type Domains from Observations -- On Avoiding

Redundancy in Inductive Logic Programming -- Generalization
Algorithms for Second-Order Terms -- Circumscription Policies for
Induction -- Logical Markov Decision Programs and the Convergence of
Logical TD(?) -- Learning Goal Hierarchies from Structured
Observations and Expert Annotations -- Efficient Evaluation of
Candidate Hypotheses in -log -- An Efficient Algorithm for Reducing
Clauses Based on Constraint Satisfaction Techniques -- Improving Rule
Evaluation Using Multitask Learning -- Learning Logic Programs with
Annotated Disjunctions -- A Simulated Annealing Framework for ILP --
Modelling Inhibition in Metabolic Pathways Through Abduction and
Induction -- First Order Random Forests with Complex Aggregates --
A Monte Carlo Study of Randomised Restarted Search in ILP --
Addendum -- Learning, Logic, and Probability: A Unified View.

Sommario/riassunto

"How often we recall, with regret", wrote Mark Twain about editors, "that Napoleon once shot at a magazine editor and missed him and killed a publisher. But we remember with charity, that his intentions were good." Fortunately, we live in more forgiving times, and are openly able to express our pleasure at being the editors of this volume containing the papers selected for presentation at the 14th International Conference on Inductive Logic Programming. ILP 2004 was held in Porto from the 6th to the 8th of September, under the auspices of the Department of Electrical Engineering and Computing of the Faculty of Engineering of the University of Porto (FEUP), and the Laborat'orio de Intelig^encia Artificial e Ci^encias da Computa, c^ ao (LIACC). This annual meeting of ILP practitioners and curious outsiders is intended to act as the premier forum for presenting the most recent and exciting work in the field. Six invited talks—three from fields outside ILP, but nevertheless highly relevant to it—and 20 full presentations formed the nucleus of the conference. It is the full-length papers of these 20 presentations that comprise the bulk of this volume. As is now common with the ILP conference, presentations made to a "Work-in-Progress" track will, hopefully, be available elsewhere. We gratefully acknowledge the continued support of Kluwer Academic Publishers for the "Best Student Paper" award on behalf of the Machine Learning journal; and Springer-Verlag for continuing to publish the proceedings of these conferences.
