1.	Record Nr.	UNINA9910768183703321
	Titolo	Rules in Database Systems [[electronic resource]] : Third International Workshop, RIDS '97, Skövde, Sweden, June 26-28, 1997 Proceedings / / edited by Andreas Geppert, Mikael Berndtsson
	Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 1997
	ISBN	3-540-69588-5
	Edizione	[1st ed. 1997.]
	Descrizione fisica	1 online resource (VIII, 219 p.)
	Collana	Lecture Notes in Computer Science, , 0302-9743 ; ; 1312
	Disciplina	005.74
	Soggetti	Data structures (Computer science) Database management Data Structures and Information Theory Database Management
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Bibliographic Level Mode of Issuance: Monograph
	Nota di contenuto	Deductive object-oriented database systems: A survey -- Integrating dynamic aspects into deductive object-oriented databases -- FOLRE: A deductive database system for the integrated treatment of updates -- An introduction to the TriggerMan asynchronous trigger processor -- Logging and post-mortem analysis of workflow executions based on event histories -- Rule modelling and simulation in ALFRED -- Using the properties of datalog to prove termination and confluence in active databases -- On confluence property of active databases with meta-rules -- An implementation and evaluation of the Refined Triggering Graph method for active rule termination analysis -- Investigating termination in active database systems with expressive rule languages -- On control flow testing of active rules in a declarative object-oriented framework -- Validating active rules by planning -- Active-design: A generic toolkit for deriving specific rule execution models.
	Sommario/riassunto	This book constitutes the strictly refereed post-workshop proceedings of the Third International Workshop on Rules in Database Systems, RIDS '97, held in Skövde, June 1997. The 13 revised papers presented in the book were carefully reviewed and selected from 33 submissions. The book documents the state-of-the art in the area. The papers are

devoted to deductive databases, active database systems architectures, events in workflow management, rule modelling and simulation, rule confluence, rule termination analysis, rule testing and validation, active database systems design.
