

1. Record Nr.	UNINA9910768193103321
Autore	Janic Milan
Titolo	Resilience, Robustness, and Vulnerability of Transport Systems : Analysis, Modelling, and Practice / / by Milan Jani
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2022
ISBN	9783031130403 9783031130397
Edizione	[1st ed. 2022.]
Descrizione fisica	1 online resource (446 pages)
Collana	Social Sciences Series
Disciplina	380.5 388
Soggetti	Transportation engineering Traffic engineering Industrial management Security systems Transportation Technology and Traffic Engineering Industrial Management Security Science and Technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Road transport system -- Rail transport system -- Air transport system -- Maritime transport system -- Epilogue.
Sommario/riassunto	This book is focused on the analysis and modelling of resilience, robustness, and vulnerability of transport systems and their complement: reliability. It provides an elaboration on their generic concepts, analysing disruptive events and nature of their impacts. It also offers an analysis and modelling of the system performances and their indicators relevant for the main actors involved. Applications of the models of performances and their resilience, robustness, and vulnerability to the selected cases of road, rail, air, and maritime transport mode affected by different internal and external disruptive events are also presented. By offering readers a systematic and comprehensive way of dealing with the topic of resilience, robustness, and vulnerability of transport systems and their complement, reliability,

this book will be of interest to researchers and professionals alike
within the transport industry.
