Sommario/riassunto	Changing Habits of Mind presents a theory of personality that integrates homeostatic dynamics of the brain with self-processes, emotionality, cultural adaptation, and personal reality. Informed by the

author's brain-based, relational psychotherapeutic practice, the book discusses the brain's evolutionary growth, the four information-processing areas of the brain, and the cortex in relationship to the limbic system. Integrating the different experiences of sensory and non-sensory processes in the brain, the text introduces a theory of personality currently lacking in psychotherapy research that integrates neurobiology and psychology for the first time. Readers will learn how to integrate psychodynamic processes with cognitive behavioral techniques, while clinical vignettes exemplify the interaction of neurophysiological process with a range of psychological variables including homeostasis, developmental family dynamics, and culture. Changing Habits of Mind expands the psychotherapist's perspective, exploring the important links between an integrated theory of personality and effective clinical practice.

Sommario/riassunto	The four-volume set LNCS 14369 until 14372 constitutes the refereed proceedings of the 21st International Conference on Theory of Cryptography, TCC 2023, held in Taipei, Taiwan, in November/December 2023. The total of 68 full papers presented in the proceedings was carefully reviewed and selected from 168 submissions. They focus on topics such as proofs and outsourcing; theoretical foundations; multi-party computation; encryption; secret sharing, PIR and memory checking; anonymity, surveillance and tampering; lower bounds; IOPs and succinctness; lattices; quantum cryptography; Byzantine agreement, consensus and composability. .
