Sommario/riassunto	"Being Pagan, being Christian in late antiquity and early middle ages brings together researchers from various fields, including archaeology, history, classical studies, and theology, to enhance discussion of this period of change as one continuum across the artificial borders of the different scholarly disciplines. With new archaeological data and contributions from scholars specializing on both textual and material remains, these different fields of study shed light on how religious identities of the people of the past are defined and identified. The contributions reassess the interplay of diversity and homogenising tendencies in a shifting religious landscape. Beyond the diversity of traditions, this book highlights the growing capacity of Christianity to hold together, under its control, the different dimensions - identity, cultural, ethical and emotional - of individual and collective religious experience."--Publisher's website.
