Sommario/riassunto

Nonprofit Digital Demystified by Ali A. Gooyabadi and Zahra Newton Lee offers a comprehensive guide for nonprofit organizations (NPOs) navigating digital transformation. The book addresses the unique challenges NPOs face in adopting digital technologies, contrasting their experiences with those of corporations and government entities. It highlights the pitfalls of relying on consultants unfamiliar with NPOs' distinct needs and emphasizes the importance of a holistic, culture-driven approach to digital initiatives. The authors aim to empower NPO leaders, staff, and consultants by demystifying digital transformation, promoting innovation, and ensuring these organizations can continue their missions effectively in an increasingly digital world. The intended audience includes nonprofit leaders, community organizers, social workers, and other stakeholders interested in integrating digital strategies into their work.
