

1. Record Nr.	UNINA9910772078103321
Autore	Mishra Anand
Titolo	Modeling the Pinian System of Sanskrit Grammar
Pubbl/distr/stampa	Heidelberg, : Heidelberg University Publishing (heiUP), 2019
ISBN	3-946054-54-4
Descrizione fisica	1 online resource (168)
Soggetti	Computational linguistics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>The present work is a study of the Adhy of Pini from a new perspective. It attempts to explore the Pinian system of Sanskrit grammar from a formal point of view and investigate the possibilities of representing it in a logical, explicit and consistent manner. It puts forward an appropriate framework for such a representation. Differing from the formulation of Adhy, which is composed in an artificial yet natural language and is meant to be employed by individuals who are acquainted both with the Sanskrit language and the techniques of grammar, the present rendering aims for a non-verbal representation in terms of mathematical categories and logical relations which can be implemented in an algorithmic manner.</p> <p>The formal framework suggested in this work would facilitate adequate tools for postulating and evaluating hypotheses about the grammatical system. Moreover, it would furnish the basis for a computer implementation of the grammar. Both these aspects are objects of enquiry in the field of theoretical studies on Pini as well as the emerging discipline of Sanskrit computational linguistics. This book takes on the ground-work in these areas.</p>
