women and men of childbearing age in the Netherlands and Australia  
-- Are female part-time workers dualised in South Korea? Institutional  
structures and employment conditions of South Korean female part-  
time jobs -- Conclusion and prospects -- Index

---

Sommario/riassunto

This volume brings together leading international authors from a number of fields to provide an up-to-date understanding of part-time work at national, sector, industry and workplace levels. The contributors critically examine part-time employment in different institutional settings across Europe, the USA, Australia and Korea. This analysis serves as a prism to investigate wider trends, particularly in female employment, including the continued increase in part-time work and processes that are increasingly creating dualisation and inequality between 'good' and 'bad' jobs.
