| Sommario/riassunto      | "The Dynamics of Right-Wing Extremism within German Society explores the prevalence of right-wing extremist attitudes in Germany. The book provides a thorough psychosocial and sociological theory of general authoritarian dynamics to explain broader societal attitudes, particularly focusing on right-wing extremists. It provides a uniquely long-term perspective on the different dimensions of right-wing extremism-the affinity for dictatorial forms of government, chauvinist attitudes, the trivialisation or justification of National Socialism, anti-Semitism, xenophobia, and social Darwinism. The first chapter delineates the theoretical framework of authoritarian dynamics, while subsequent chapters provide an in-depth analysis of empirical findings and distinguish authoritarian and democratic typologies. The authors focus on recognition of authoritarian statehood and anti-Semitism; the relationship between religion and right-wing extremism; and support for the radical-right populist party, Alternative fur Deutschland (AFD). The innovative theoretical approach of this book scrutinises the theory of authoritarianism in the contemporary world. This book provides unique empirical data and will be of interest to scholars of German |

politics, anti-democratic attitudes and prejudices, sociology, political science, and social psychology"-- Provided by publisher.
