Sommario/riassunto	As Norberto Bobbio writes in one of the essays included in this book, Silvio Trentin was an exceptional figure of a man of study and action, who never dissociates the commitment of the scholar from that of the militant, for whom, titles of the two famous essays by Max Weber, both school and politics are together, and not separately, a profession and a vocation. Not separately, and yet not confused. Trentin perfectly knew how to give science what it is of science and to politics what is of politics.
