

1. Record Nr.	UNINA9910777014903321
Titolo	Fundamental interactions [[electronic resource]] : proceedings of the 21st Lake Louise Winter Institute, Lake Louise, Alberta, Canada, 17-23 February, 2006 // editors, Alan Astbury, Faqir Khanna, Roger Moore
Pubbl/distr/stampa	Singapore ; ; Hackensack, NJ, : World Scientific, c2006
ISBN	1-281-91207-7 9786611912079 981-277-254-5
Descrizione fisica	1 online resource (396 p.)
Altri autori (Persone)	AstburyA KhannaF. C <1935-> (Faqir Chand) MooreRoger
Disciplina	539.7
Soggetti	Nuclear reactions Particles (Nuclear physics) Particles (Nuclear physics) - Measurement Standard model (Nuclear physics) - Measurement Astrophysics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	CONTENTS ; Preface ; Making Precision Measurements at Hadron Colliders: Two Lectures ; Lecture I: The Electroweak Scale: Top, the W and Z, and the Higgs via M_W and M_{Top} ; 1. Introduction and Purpose ; 2. Problems in Making Precision Measurements ; 3. Some History and Cultural Background ; 4. The Tevatron and the LHC ; 5. The Anatomy of Detectors at Hadron Collider: Basics ; 6. Calibration Techniques: CDF as an Example ; 7. W and Z° Production as PDF Probes; 8. 'QCD'- Jet Production, Quark and Gluons, ISR, FSR; 9. Min Bias, Zero Bias, and the UEV: 'Soft' Physics; 10. The MTop - M_W Plane and the Higgs Mass; 11. Measuring the Top Quark Mass and Cross-section ; 12. Theoretical Motivation and Experimental Caution

13. Direct Search for the Higgs Measurements in B Physics
 Topics: Challenges for Students
 Summary ; 17. Acknowledgments
 References ; Evidence for a Quark-Gluon Plasma at RHIC; 1. Introduction

14. Precision ; 15. Expert ; 16.
 ; 17. Acknowledgments ;

2. Large Energy and Particle Densities Created at RHIC
 3. Observation of Strong Elliptic Flow at RHIC
 ; 4. Is the System Thermalized? ; 5. Suppression of Large Transverse Momentum Particles
 ; 6. Effects of Jet Quenching on Azimuthal Correlations
 ; 7. J/ ; 8. Summary and Conclusions
 References Fundamental Experiments at Low Energies
 ; Abstract ; Introduction ; Symmetry tests by low-energy experiments ; CPT invariance and parity violation ; Electric Dipole Moment
 ; Absolute mass of the neutrino ; Scalar or Tensor Contributions to Weak Interaction
 Unitarity of the CKM Matrix

Sommario/riassunto

This proceedings volume contains the latest developments in particle physics in collider experiments. The contributions cover new results such as the production of quark-gluon plasma in the heavy-ion collider, the new techniques for precision measurement at low energies, and the status of neutrino physics at various laboratories including the new facilities that are at the planning stage. <i>Sample Chapter(s)</i>
Chapter 1: Making Precision Measurements at Hadron Colliders: Two Lectures (1,408 KB)
