

1. Record Nr.	UNINA9910777036503321
Autore	Kruuk Hans
Titolo	Otters [[electronic resource]] : Ecology, Behaviour and Conservation
Pubbl/distr/stampa	Oxford, : Oxford University Press, UK, 2006
ISBN	1-280-90383-X 0-19-151372-5 1-4294-7018-6
Descrizione fisica	1 online resource (278 p.)
Disciplina	599.769
Soggetti	Otters Vertebrates Zoology Health & Biological Sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Contents; 1 Otter ecology and its background; 2 Pen pictures. Thirteen otters of the world: some natural history; 3 Evolutionary relationships, questions and methods of otter ecology; 4 Habitats; 5 Groups and loners: social organization; 6 Scent marking and interactions: social behaviour; 7 Diet; 8 Resources: about fish and other prey; 9 Otters fishing: hunting behaviour and strategies; 10 Thermo-insulation: a limiting factor; 11 Populations, recruitment and competition; 12 Survival and mortality; 13 Syntheses: challenges to otter survival; 14 Otters, people and conservation; References Index
Sommario/riassunto	Otters are highly charismatic and popular animals of very considerable concern to conservationists worldwide. There is a real need for an affordable, well illustrated and appealing text that also contains substantial factual information. This book will build on the reputation of Kruuk's landmark monograph of the European Otter (Wild Otters) published by OUP in 1995. Furthermore, its broader scope to include all otter species should lead to a deeper synthesis that will greatly. expand the book's overall relevance and potential readership. - ;Otters are highly charismatic and popular animals of
