|-------------------------|---|
| 1. Record Nr. | UNINA9910777054503321 |
| Autore | Kim Kiseon |
| Titolo | CDMA systems capacity engineering [[electronic resource] /] / Kiseon Kim, Insoo Koo |
| Pubbl/distr/stampa | Boston, Mass., : Artech House, c2005 |
| ISBN | 1-58053-813-4 |
| Descrizione fisica | 1 online resource (217 p.) |
| Collana | Artech House mobile communications series |
| Altri autori (Persone) | KoolInsoo |
| Disciplina | 621.3845/6 |
| Soggetti | Code division multiple access Capacity theory (Mathematics) |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references and index. |

Sommario/riassunto

This new hands-on resource tackles capacity planning and engineering issues that are crucial to optimizing wireless communication systems performance. Going beyond the system physical level and investigating CDMA system capacity at the service level, this volume is the single-source for engineering and analyzing systems capacity and resources. The book shows you how to quantify system capacity to enable you to design appropriate resource management and capacity strategies. When channel elements are limited, you know system capacity is critical, and this book shows you how to analyze voice, data,
