**Sommario/riassunto**

Victor Zhivov's Language and Culture in Eighteenth-Century Russia is one of the most important studies ever published on eighteenth-century Russia. Historians and students of Russian culture agree that the creation of a Russian literary language was key to the formation of a modern secular culture, and this title traces the growth of a vernacular language from the "hybrid Slavonic" of the late seventeenth century through the debates between "archaists and innovators" of the early nineteenth century. Zhivov's study is an essential work on the genesis of modern Russian culture; the aim of this translation is to make it available to historians and students of the field.

**Sommario/riassunto**

Following World War II, the Catholic Church in Europe faced the challenge of establishing political influence with newly emerging democratic governments. The Church became, as Carolyn Warner pointedly argues, an interest group like any other, seeking to attain and solidify its influence by forming alliances with political parties. The author analyzes the Church's differing strategies in Italy, France, and Germany using microeconomic theories of the firm and historical institutionalism. She demonstrates how only a strategic perspective can explain the choice and longevity of the alliances in each case. In so doing, the author challenges earlier work that ignores the costs to interest groups and parties of sustaining or breaking their reciprocal links. Confessions of an Interest Group challenges the view of the Catholic Church as solely a moral force whose interests are seamlessly represented by the Christian Democratic parties. Blending theory, cultural narrative, and archival research, Warner demonstrates that the French Church's superficial and brief connection with a political party was directly related to its loss of political influence during the War. The Italian Church's power, on the other hand, remained stable through the War, so the Church and the Christian Democrats more easily found multiple grounds for long-term cooperation. The German Church chose yet another path, reluctantly aligning itself with a new Catholic-Protestant party. This book is an important work that expands the growing literature on the economics of religion, interest group behavior, and the politics of the Catholic Church.
