Corporate Governance In A Globalising World: Convergence Or Sommario/riassunto Divergence? presents a broad and multi-disciplinary debate on corporate governance systems by integrating academic viewpoints, statistical evidence, as well as field surveys. Based on a large number of publications and studies, the opinions of researchers are grouped into three categories: those that believe in a convergence into the direction

of the market-oriented model (with the Anglo-American model as the reference base), those that opt for another type of convergence, namely in the direction of a hybrid corporate governance model (based on

cross-reference between different leading governance models), and those that do not believe in global convergence but adhere to diversity of governance models.
