## Sommario/riassunto

Combining theory, research and policy Consuming Interests provides a topical interdisciplinary exploration into the nature of food provision, policy and regulation. The book provides a detailed examination of corporate retailers, state agencies and consumer organisations involved in the food sector. The analysis explores questions including: \* what can the public expect from the state\* what limits are there on state action\* what are the most appropriate balancesbetween public and private interests in the provision of 'quality' foods.
