Sommario/riassunto

This book demonstrates how the underlying principles of the English-based FrameNet project are successfully applied to the description and analysis of typologically diverse languages. The stimulating collection of articles brings together insights from lexical semantics, corpus linguistics, computational lexicography, machine learning, and psychology to address three main questions: To what degree is it possible to apply semantic frames derived from the English lexicon to the description and analysis of other languages? What types of resources are necessary for the creation of FrameNets for French, German, Hebrew, Japanese, and Spanish? How can the creation of multi-lingual FrameNets be automated? The contents exemplifies the liveliness of current research on cross-lingual applications of Frame Semantics to natural language processing.

Sommario/riassunto

Civil War officer, Reconstruction ""carpetbagger,"" best-selling novelist, and relentless champion of equal rights, Albion Tourgee battled his entire life for racial justice. Now, in this engaging biography, Mark Elliott offers an insightful portrait of a fearless lawyer, jurist, and writer, who fought for equality long after most Americans had abandoned the ideals of Reconstruction. Elliott provides a fascinating account of Tourgee's life, from his childhood in the Western Reserve region of Ohio (then a hotbed of abolitionism), to his years as a North Carolina judge during Reconstruction, to
