Sommario/riassunto

Genocide is one of the most pressing issues that confronts us today. Its death toll is staggering: over one hundred million dead. Because of their intimate experience in the communities where genocide takes place, anthropologists are uniquely positioned to explain how and why this mass annihilation occurs and the types of devastation genocide causes. This ground breaking book, the first collection of original essays on genocide to be published in anthropology, explores a wide range of cases, including Nazi Germany, Cambodia, Guatemala, Rwanda, and Bosnia.
