Sommario/riassunto

The Elements of War Crimes will assist the International Criminal Court (ICC) in the interpretation and application of the articles of the ICC Statute defining the crimes under its jurisdiction. These will not only be necessary for the future work of the ICC in interpreting the crimes provisions, but also for national courts, which have primary responsibility in the prosecution of international crimes under the Rome Statute. This commentary provides a critical insight into the travaux preparatoires of the Preparatory Commission leading to the adoption of the elements of war crimes. It contains an analysis of existing case law related to each war crime in the Statute. It will provide States, judges, prosecutors and international and national lawyers with key background information to implement international humanitarian law in future cases dealing with war crimes under the ICC. A unique, indispensable tool for prosecuting and defense lawyers working in international criminal law.

Sommario/riassunto	Concern about the fate of waste products produced by a wide range of industrial processes has led to the realization that they may have potential uses and, therefore, value. In an effort to develop more sustainable processes and reduce waste storage, the use of waste as a resource has been gaining attention worldwide. Consequently, there have been a large number of studies aimed at utilizing such wastes. Conversion of Large Scale Wastes into Value-added Products discusses various selected classes of large-scale waste and their current applications and potential future applications.<B
