Sommario/riassunto	The great biologist Louis Pasteur suppressed data that didn't support the case he was making. Albert Einstein's theory of general relativity was only 'confirmed' in 1919 because an eminent British scientist massaged his figures. Joseph Lister's famously spotless hospital wards

were actually notoriously dirty. Gregor Mendel, supposed father of the science of heredity, never grasped the fundamental principles of 'Mendelian' genetics. Often startling, always enthralling, FabulousScience reveals the truth behind these and many other myths in the history of science. - ;The great biologist Louis Pas
