

1. Record Nr.	UNINA9910777768503321
Autore	Jackendoff Ray <1945->
Titolo	Language, consciousness, culture : essays on mental structure // Ray Jackendoff
Pubbl/distr/stampa	Cambridge, Mass., : MIT Press, ©2007 ©2007
ISBN	0-262-30364-7 1-282-09889-6 9786612098895 0-262-27610-0 1-4294-8030-0
Descrizione fisica	1 online resource (431 p.)
Collana	The Jean Nicod lectures ; ; 2007
Disciplina	401.9
Soggetti	Psycholinguistics Consciousness Mind and body Language and culture
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"A Bradford Book."
Nota di bibliografia	Includes bibliographical references (p. [369]-391) and index.
Nota di contenuto	Series Foreword; Preface; Acknowledgments; PART I The Nicod Lectures; Chapter 1 Mental Structure; Chapter 2 Reintegrating Generative Grammar; Chapter 3 Conscious and Unconscious Aspects of Language Structure; Chapter 4 Shaking Hands and Making Coffee: The Structure of Complex Actions; Chapter 5 Cognition of Society and Culture; PART II The Structure of Social Cognition and Theory of Mind; Chapter 6 Perception Verbs and Theory of Mind; Chapter 7 Objective and Subjective Psychological and Evaluative Predicates; Chapter 8 Intending and Volitional Action; Chapter 9 The Logic of Value Chapter 10 Fairness, Reciprocity, and ExchangeChapter 11 Rights and Obligations; Chapter 12 Trumpets and Drums; References; Index
Sommario/riassunto	An integrative approach to human cognition that encompasses the domains of language, consciousness, action, social cognition, and theory of mind that will foster cross-disciplinary conversation among

linguists, philosophers, psycholinguists, neuroscientists, cognitive anthropologists, and evolutionary psychologists. Ray Jackendoff's *Language, Consciousness, Culture* represents a breakthrough in developing an integrated theory of human cognition. It will be of interest to a broad spectrum of cognitive scientists, including linguists, philosophers, psycholinguists, neuroscientists, cognitive anthropologists, and evolutionary psychologists. Jackendoff argues that linguistics has become isolated from the other cognitive sciences at least partly because of the syntax-based architecture assumed by mainstream generative grammar. He proposes an alternative parallel architecture for the language faculty that permits a greater internal integration of the components of language and connects far more naturally to such larger issues in cognitive neuroscience as language processing, the connection of language to vision, and the evolution of language. Extending this approach beyond the language capacity, Jackendoff proposes sharper criteria for a satisfactory theory of consciousness, examines the structure of complex everyday actions, and investigates the concepts involved in an individual's grasp of society and culture. Each of these domains is used to reflect back on the question of what is unique about human language and what follows from more general properties of the mind. *Language, Consciousness, Culture* extends Jackendoff's pioneering theory of conceptual semantics to two of the most important domains of human thought: social cognition and theory of mind. Jackendoff's formal framework allows him to draw new connections among a large variety of literatures and to uncover new distinctions and generalizations not previously recognized. The breadth of the approach will foster cross-disciplinary conversation; the vision is to develop a richer understanding of human nature.
