Sommario/riassunto	<p>Le xviii siècle est un temps de troubles pour les Pays-Bas espagnols. Après l'intermède glorieux des Archiducs, ce territoire est de nouveau ravagé par les luttes incessantes que se livrent les différents souverains d'Europe à l'instar des guerres de Louis XIV. La ville de Namur, place forte stratégique sur le chemin des armées belligérantes au confluent de la Sambre et de la Meuse, n'est pas épargnée par les conflits et subit les conséquences de ce temps de « Malheurs ». Dans ce contexte, cet ouvrage analyse l'activité pénale et la criminalité réprimée par la justice urbaine dans la seconde moitié du xviii siècle. À partir des archives judiciaires de la Haute Cour, l'auteur analyse l'organisation et le fonctionnement complexe de la justice urbaine, l'action répressive de cette dernière et les différents crimes et délits jugés et réprimés à Namur. Ce livre met en lumière les processus de régulation des infractions, les acteurs qui les commettent et les jugent, mais surtout les mentalités face au crime en cette époque troublée.</p>

Sommario/riassunto

This book examines how educators internationally can better understand the role of education as a public good designed to nurture peace, tolerance, sustainable livelihoods and human fulfilment. Bringing together empirical and theoretical perspectives, this insightful text develops new understandings of education for sustainable development and global citizenship (ESD/GC) and illustrates how these might impact on educational research, policy and practice. The text recognizes the ESD/GC as pivotal to the universal ambitions of UNESCO's Sustainable Development Goals, and focuses on the role of teachers and teacher educators in delivering the appropriate educational response to promote equity and sustainability. Chapters explore factors including curriculum design, values and assessment in teacher education, and consider how each and every learner can be guaranteed an understanding of their role in promoting a just and sustainable global society. This book will be of great interest to academics, researchers, school leaders, practitioners, policy makers and students in the fields of education, teacher education and sustainability.
