Sommario/riassunto	This is the first book to examine in full the interconnections between Giambattista Vico's new science and James Joyce's Finnegans Wake. Maintaining that Joyce is the greatest modern "interpreter" of Vico, Donald Phillip Verene demonstrates how images from Joyce's work offer keys to Vico's philosophy. Verene presents the entire course of Vico's philosophical thought as it develops in his major works, with Joyce's words and insights serving as a guide. The book devotes a chapter to each period of Vico's thought, from his early orations on education to his anti-Cartesian metaphysics and his conception of universal law, culminating in his new science of the history of nations. Verene analyzes Vico's major works, including all three editions of the New Science. The volume also features a detailed chronology of the philosopher's career, historical illustrations related to his works, and an

extensive bibliography of Vico scholarship and all English translations
of his writings.
