

1. Record Nr.	UNINA9910777861403321
Autore	Scott James C
Titolo	Seeing like a state : how certain schemes to improve the human condition have failed // James C. Scott
Pubbl/distr/stampa	New Haven, : Yale University Press, c1998
ISBN	9786611729134 1-281-72913-2 0-300-12878-9
Descrizione fisica	1 online resource (462 p.)
Collana	Yale agrarian studies Yale ISPS series
Disciplina	338.9
Soggetti	Central planning - Social aspects Social engineering Authoritarianism
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 359-434) and index.
Nota di contenuto	pt. 1. State projects of legibility and simplification -- pt. 2. Transforming visions -- pt. 3. The social engineering of rural settlement and production -- pt. 4. The missing link.
Sommario/riassunto	Compulsory ujamaa villages in Tanzania, collectivization in Russia, Le Corbusier's urban planning theory realized in Brasilia, the Great Leap Forward in China, agricultural "modernization" in the Tropics-the twentieth century has been racked by grand utopian schemes that have inadvertently brought death and disruption to millions. Why do well-intentioned plans for improving the human condition go tragically awry? In this wide-ranging and original book, James C. Scott analyzes failed cases of large-scale authoritarian plans in a variety of fields. Centrally managed social plans misfire, Scott argues, when they impose schematic visions that do violence to complex interdependencies that are not-and cannot-be fully understood. Further, the success of designs for social organization depends upon the recognition that local, practical knowledge is as important as formal, epistemic knowledge. The author builds a persuasive case against "development theory" and imperialistic state planning that disregards the values,

desires, and objections of its subjects. He identifies and discusses four conditions common to all planning disasters: administrative ordering of nature and society by the state; a "high-modernist ideology" that places confidence in the ability of science to improve every aspect of human life; a willingness to use authoritarian state power to effect large-scale interventions; and a prostrate civil society that cannot effectively resist such plans.
