Sommario/riassunto	<p>Long description: Zahlreiche Studien zum Lernen in den Naturwissenschaften konnten zeigen, dass Schwierigkeiten der Lernenden in vielen Fällen auf vorunterrichtliche Vorstellungen zurückzuführen sind. Diese Konzepte sind häufig inkonsistent und können nicht sinnvoll mit den wissenschaftlichen Vorstellungen, die im Unterricht vermittelt werden sollen, in Verbindung gebracht werden. Die vorliegende Studie untersucht die Entwicklung der Vorstellungen zum Verbrennungsprozess längsschnittlich und überprüft darüber hinaus mittels eines quasiexperimentellen Designs, ob die Unterrichtskonzeption 'Chemie im Kontext' (ChiK) die Entwicklung von Fehlkonzepten hin zu wissenschaftlichen Konzepten unterstützen kann. Für die Studie wurden mehr als 900 Schülerinnen und Schüler in 37 Klassen im ersten Unterrichtsjahr Chemie zu drei Messzeitpunkten schriftlich befragt. Die Ergebnisse weisen darauf hin, dass Konzeptwandelprozesse im Unterricht stattfinden, jedoch häufig unvollständig bleiben. Die Schülerinnen und Schüler, die nach ChiK unterrichtet wurden, zeigten im Vergleich signifikant bessere Ergebnisse.</p>

Sommario/riassunto	This new edition of Adolescent Pregnancy contains everything a social worker needs to know to address adolescent sexual health risks and the recent rise in teen pregnancy rates. The second edition presents a new focus on cultural competence, presenting up-to-the-minute research on ethnically diverse populations. This edition goes beyond just adolescent pregnancy, discussing STI and HIV risks, as well as drug and alcohol abuse. Other cutting-edge topics include the sexualization of children, secondary prevention, the impact of abstinence-only

Sommario/riassunto	In the mid-1870s, the experimental therapy of lamb blood transfusion spread like an epidemic across Europe and the USA. Doctors tried it as a cure for tuberculosis, pellagra and anemia; proposed it as a means to reanimate seemingly dead soldiers on the battlefield. It was a contested therapy because it meant crossing boundaries and challenging taboos. Was the transfusion of lamb blood into desperately sick humans really defensible? The book takes the reader on a journey into hospital wards and lunatic asylums, physiological laboratories and 19th century wars. It presents a fascinating story of medical knowledge, ambitions and concerns - a story that provides lessons for current debates on the morality of medical experimentation and care.
