Sommario/riassunto

In this edited collection leading authors in the field draw on their experience to address key methodological questions and challenges that have arisen from the recent proliferation of research projects and government funded initiatives on violence against women. Topics include: evaluation research and feminist methodology; using quantitative and qualitative approaches; ethics, safety and access in sensitive research; interviewing practitioners, perpetrators, policy makers, and survivors (including children, women and young people); utilising discourse analysis to interpret data; undertaking c
