Sommario/riassunto	Climate change is acknowledged to be the major problem currently facing the human race, and the need to reduce our carbon footprint becomes ever more urgent as the scientific predictions of the effects of climate change become increasingly dire. Whether we are fully aware of the social and political consequences of striving for a significant

reduction is more questionable. The Carbon Footprint Wars identifies the many dangers inherent in the projected solutions - such as retreating from the spread of globalization, the current socio-economic paradigm for world trade. The war of words that is b
