Sommario/riassunto

This study evaluates the effectiveness of the World Bank Group's support for health, nutrition, and population (HNP) in developing countries from 1997 to 2008 - totaling more than 17 billion - and distills lessons for greater impact in the future. It finds that the Bank Group now funds a smaller share of global support for HNP than a decade ago, but its support remains substantial and adds considerable value. About two-thirds of the Bank's HNP support has had satisfactory outcomes, often in difficult environments. But in a number of country settings, particularly in Africa, it has not perform
