Sommario/riassunto

This is the fifth glaucoma World Glaucoma Association Consensus. As with other consensus topics, the discussion and conclusions of Glaucoma Screening, the subject for the 2008 consensus, will have broad impact. The global faculty, consisting of leading authorities on various aspects of glaucoma screening, met in Fort Lauderdale on April 26, 2008 to discuss the reports and refine the consensus statements. The Consensus Panel also met at that time, as well as electronically during the subsequent four weeks.
