Sommario/riassunto	Interpretazioni is an intermediate- to advanced-level Italian textbook that aims to teach language through film, focusing on Italian movies from 2010 to 2016. Teaching language through cinema is a widespread and proven practice that engages all four main language skills (speaking, listening, reading, writing), and Interpretazioni does so via the proven format and pedagogy of Pausini and Antonello Borra's previous book, Italian Through Film (Yale UP, 2003), which has enjoyed success and is regarded highly among teachers. Films featured in Interpretazioni span genres, address a wide range of themes, and are set in various parts of Italy, encouraging students and teachers to more fully engage with the complexity of Italian cinema. As in Italian Through Film, the activities based on the films are divided into three main categories (before, during, and after viewing the film) with a natural progression from warm-up questions, to closed and controlled exercises, to open ended and creative tasks, both oral and written, including grammar practice, all within the context of each single film. An instructor's manual with answer key will be available for teachers on

the GUP website.

Sommario/riassunto	This is the first comprehensive estate-planning guide for those living with a chronic disease or disability. This book is targeted at those

planning for the disbursement of their estates, no matter their size. Estate-planning is crucial for those living with a chronic disease or disability: individuals must express their preferences whether to receive long-term care at home rather than in a nursing home in the event that they become more disabled, and it is more important for one who has a chronic illness to name a power of attorney. Estate Planning for People with a Chronic Condition or Disabi
