

1. Record Nr.	UNINA9910778073703321
Autore	Lodge K. R (Ken R.)
Titolo	Fundamental concepts in phonology : sameness and difference / / Ken Lodge [[electronic resource]]
Pubbl/distr/stampa	Edinburgh : , : Edinburgh University Press, , 2009
ISBN	0-7486-7141-2 1-282-13644-5 9786612136443 0-7486-3110-0
Descrizione fisica	1 online resource (vii, 160 pages) : digital, PDF file(s)
Classificazione	ET 200
Disciplina	414
Soggetti	Grammar, Comparative and general - Phonology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 02 Oct 2015).
Nota di bibliografia	Includes bibliographical references (p. [143]-153) and index.
Nota di contenuto	The notions of sameness and difference -- Sameness and meaningful contrast in phonology -- Biuniqueness and monosystemicity -- Segmentation -- Phonetic implementation and abstractness -- Declarative phonology: an alternative set of proposals -- Panlectal grammars.
Sommario/riassunto	This book is an investigation of the basic concepts of phonological theory. In particular it is concerned with the concepts of sameness and difference, each a sine qua non of classification. It is assumed that all academic disciplines operate with these two basic concepts when classification is involved. Since phonology is the area of linguistics that deals with the interface between the abstract system of native speaker knowledge and physical entities in the world, the linguistic classification of those physical entities needs to be guided by clear and rigorously applied criteria for deciding what constitutes the same sound and what not. During the development of modern linguistics over the past hundred years or so it has generally been assumed that the criteria for classification are to be found in a segmented version of the phonetic continuum of spoken language. This is still largely the case today, even though the system of native speaker knowledge of language is seen as a highly abstract mental representation of that

knowledge. This book questions the basis of such assumptions, in particular segmentation, abstractness, monosystemicity and derivation. Key features: \*The first book to deal with aspects of phonology which are often ignored or passed over very briefly in the available literature, yet are at the core of the subject. \*Considers various recent developments across a range of phonological theories. \*Explores a range of key issues in phonological theory which relate to the application of sameness and difference: biuniqueness, monosystemicity, derivation, specification, abstractness, segmentation, panlectal grammars.

Leader-Member Exchange Measurement / Robert C. Liden, Junfeng Wu, Xiaoyun Cao, Sandy J. Wayne.

Sommario/riassunto

Leader-member exchange (LMX) is the foremost dyadic theory in the leadership literature. Whereas contemporary leadership theories, such as transformational, servant, or authentic, focus on the effects of leader behaviors on employee attitudes, motivation, and team outcomes, relational leadership theory views the dyadic relationship quality between leaders and members as the key to understanding leader effects on members, teams, and organisations. This approach views the trust- and respect-based relationships as the cornerstone of

leadership.
