

1. Record Nr.	UNINA9910778082003321
Autore	Spafford George
Titolo	Greening the data center [[electronic resource]] : opportunities for improving data center energy efficiency / / George Spafford
Pubbl/distr/stampa	Ely, U.K., : IT Governance Pub., 2009
ISBN	1-84928-131-9 1-282-38453-8 9786612384530 1-84928-009-6
Edizione	[1st edition]
Descrizione fisica	1 online resource (60 p.)
Disciplina	004.0682
Soggetti	Data libraries - Energy consumption Data processing service centers - Energy conservation Information technology - Environmental aspects Green technology Social responsibility of business
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction; Chapter 1: What is "Energy Efficiency"?; Chapter 2: Processes and Planning; Chapter 3: Applications and Data; Chapter 4: Broad Themes; Chapter 5: IT Hardware; Chapter 6: Facilities - Electrical; Chapter 7: Facilities - Cooling; Chapter 8: Selecting a Data Center Location; Chapter 9: Monitoring and Reporting; Chapter 10: Conclusion; Appendix: Additional Resources; ITG Resources
Sommario/riassunto	IT organizations are under intense pressure to manage the power consumed by data centers and the resulting cooling demands. To address these needs, IT needs to properly blend people, process and technology to create solutions. This guides provides a sample of technical improvement opportunities at a high-level.
