Sommario/riassunto	A new volume in the "Perspectives in Supramolecular Chemistry"

series focusing on separating supramolecular structures, a key step in supramolecular chemistry. Two guest editors have been at the forefront of the development of chromatographical methods to deal with supramolecular systems. Reactions of supramolecular structures show the way into the future of chemistry. Fumio Toda is one of the driving forces in the development of supramolecular separation systems. A practical title in the prestigious "Perspectives in Supramolecular Chemistry" series.

[Sommario/riassunto](#)

Loving, hating, pitying, or pining for mammy became a way for Americans to make sense of shifting economic, social, and racial realities. Assertions of black contentment with servitude alleviated white fears while reinforcing racial hierarchy. McElya's stories expose the power and reach of this myth, not only in advertising, films, and literature about the South, but also in national monument proposals, child custody cases, New Negro activism, anti-lynching campaigns, and the civil rights movement.
