

1. Record Nr.	UNINA9910778202903321
Titolo	Analytical and numerical aspects of partial differential equations [[electronic resource]] : notes of a lecture series // editors, Etienne Emmrich, Petra Wittbold
Pubbl/distr/stampa	Berlin ; ; New York, : Walter De Gruyter, c2009
ISBN	1-282-29647-7 9786612296475 3-11-021210-2
Descrizione fisica	1 online resource (296 p.)
Collana	De Gruyter Proceedings in Mathematics
Classificazione	SK 500
Altri autori (Persone)	EmmrichEtienne WittboldPetra
Disciplina	515/.353
Soggetti	Differential equations, Partial Mathematical analysis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"This book grew out of a series of lectures at the Technische Universitat Berlin held by young mathematicians from France ... during the academic years 2007-2009."--Pref.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Table of contents -- S. N. Kruzhkov's lectures on first- order quasilinear PDEs -- Adaptive semi-Lagrangian schemes for Vlasov equations -- Coupling of a scalar conservation law with a parabolic problem -- Standing waves in nonlinear Schrödinger equations -- Multiscale methods coupling atomistic and continuum mechanics: some examples of mathematical analysis -- Maximal regularity and applications to PDEs -- Backmatter
Sommario/riassunto	This text contains a series of self-contained reviews on the state of the art in different areas of partial differential equations, presented by French mathematicians. Topics include qualitative properties of reaction-diffusion equations, multiscale methods coupling atomistic and continuum mechanics, adaptive semi-Lagrangian schemes for the Vlasov-Poisson equation, and coupling of scalar conservation laws.
