Sommario/riassunto	This book is designed for the neurologist who (in this day of unusually strict accountability) needs to have at hand an authoritative guide to the diagnostic criteria for all conditions that he or she may be faced with in clinical practice. While originally conceived as a compendium of diagnostic criteria, the author has felt the need to expand the work to include definitions of practically all terms that are used in neurology today. Historical elements are also provided--including entries of important neurologists and neurosurgeons who have impacted the field. The result is an effective repre

Sommario/riassunto	Long description: Raumwissen ist Macht – vor allem in einer zur Großmacht aufstrebenden Monarchie. Mit der Landesbeschreibung als neuzeitlichem Wissensformat wächst das Wissen um die – östliche – Peripherie des Habsburgerreiches im 18. und 19. Jahrhundert immens. Die Ergebnisse der umfangreichen Kartierung und Vermessung nutzen Administration, Militär und Wissenschaft. Die Verwaltung der Peripherie wird effektiver, was nicht zuletzt das Militär zu schätzen weiß. Geographie, Ethnologie und Militärwissenschaften machen große Fortschritte. Die Autorinnen und Autoren dieses Bandes geben einen Überblick über die Herausbildung des neuzeitlichen Raumwissens im Habsburgerreich. Sie zeigen, welche Vorstellungen, Denkweisen und Positionen dem zugrunde liegen, diskutieren damit verbundene theoretische, methodische und inhaltliche Fragen und verdeutlichen so die administrative, wissenschaftliche und diskursive Praxis der Herausbildung eines vollkommen neuen Wissenschaftsverständnisses. Biographical note: Reinhard Johler ist Professor am Ludwig-Uhland-Institut für Empirische Kulturwissenschaft der Universität Tübingen und

Leiter des Instituts für donauschwäbische Geschichte und Landeskunde in Tübingen. Josef Wolf ist wissenschaftlicher Mitarbeiter am Institut für donauschwäbische Geschichte und Landeskunde und leitet dort den Forschungsbereich Historische Siedlungsforschung.
