Disciplina	986.106/34
Soggetti	Negotiation - Colombia Peace Colombia Politics and government 1974-
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [213]-222) and index.
Nota di contenuto	Colombia before the presidency of Andres Pastrana : the context for failure -- The immediate context for the Pastrana negotiations : the government of Ernesto Samper (1994-1998) -- The FARC negotiations begin : June 1998-January 1999 -- The first agreements of the FARC negotiations : January 1999-January 2001 -- The negotiations in 2001 : agreements on process but not on substance -- The FARC negotiations end : January-February 2002 -- The ELN discussions through the Declaration of Geneva : September 1998-July 2000 -- The failure of the ELN discussions -- Why the Pastrana peace process failed.
Sommario/riassunto	Charts the progress and failure of Colombian President Andres Pastrana's efforts to bring an end to sixty years of civil war. The civil war in Colombia has waxed and waned for almost sixty years with shifting goals, programs, and tactics among the contending parties and with bursts of appalling violence punctuated by uneasy truces, cease-fires, and attempts at reconciliation. Varieties of Marxism, the economics of narco-trafficking, peasant land hunger, poverty, and oppression mix together in a toxic stew that has claimed uncounted lives of (most often) peasants, co

Sommario/riassunto	<p>This book makes the case for why we should care about islands and their sustainability. Islands are hotspots of biocultural diversity and home to 600 million people that depend on one-sixth of the earth's total area, including the surrounding oceans, for their subsistence. Today, they are at the frontlines of climate change and face an existential crisis. Islands are, however, potential "hubs of innovation" that are uniquely positioned to be leaders in sustainability and climate action. This volume argues that a full-fledged program on "island industrial ecology" is urgently needed, with the aim of offering policy-relevant insights and strategies to sustain small islands in an era of global environmental change. The nine contributions in this volume cover a wide range of applications of socio-metabolic research, from flow accounts to stock analysis and their relationship to services in space and time. They offer insights into how reconfiguring patterns of resource use will allow island governments to build resilience and adapt to the challenges of climate change.</p>
