Sommario/riassunto	In this engrossing history of the Hawkeye State, Dorothy Schweider reveals a place of fascinating grassroots politics, economic troubles and triumphs, surprising cultural diversity, and unsung natural beauty. Above all, this is the history of the people of Iowa and the lives they have led-the accomplishments of both ordinary and not-so-ordinary Iowans.

Sommario/riassunto

Structural and functional abnormalities of arteries and veins manifest clinically in a broad spectrum of disorders, including aneurysmal disease, atherosclerosis, vasculitis, venous insufficiency, microvascular complications, thrombo-embolism and lower limb ulceration. Many of these are common and/or chronic conditions which present for initial assessment by primary health care workers. This new edition is a practical guide to the most commonly presenting disorders, and provides a structured approach to clinical assessment, investigations and management. The last few years have seen major
