

1. Record Nr.	UNINA9910778260503321
Titolo	Distribution models theory [[electronic resource] /] / editors Rafael Herrerias Pleguezuelo, Jose Callejon Cespedes, and Jose Manual Herrerias Velasco
Pubbl/distr/stampa	New Jersey, : World Scientific, c2006
ISBN	1-281-92454-7 9786611924546 981-277-299-5
Descrizione fisica	1 online resource (307 p.)
Altri autori (Persone)	Herrerias-PleguezueloRafael Callejon-CespedesJose Herrerias--VelascoJose Manual
Disciplina	511.3/4
Soggetti	Model theory Distribution (Probability theory)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Contents; Preface; Chapter 1 Modeling Income Distributions Using Elevated Distributions on a Bounded Domain; 1. Introduction; 2. Cumulative distribution function and density function; 3. Properties of Standard RGTL distributions; 4. Maximum likelihood estimation 5. Fitting 2001 U.S. income distribution data 6. Concluding remarks; Acknowledgments; References; Chapter 2 Making Copulas Under Uncertainty; 1. Introduction; 2. Initial approach; 3. FGM distribution functions; 4. The Dorp and Kotz's distribution families and its subfamilies 5. An approach to the problem: Application of the MTDF with van Dorp and Kotz's marginals in an uncertainty environment 6. A solution; 7. A valuation method; 8. Practical application of the MTDF with van Dorp and Kotz's marginals under uncertainty environment; 9. Conclusions References Chapter 3 Valuation Method of the Two Survival Functions; 1. Introduction; 2. Valuation method of the two survival functions; 3. VMTS from a multidimensional quality index; 4. Practical application; 5. Conclusions; References

Chapter 4 Weighting Tools and Alternative Techniques to Generate Weighted Probability Models in Valuation Theory 1. Introduction; 2. Techniques to generate weighted models valuation; 3. New technique to generate weighted models ; 4. Practical application; 5. Comments and conclusions

Sommario/riassunto

*Distribution Models Theory* is a revised edition of papers specially selected by the Scientific Committee for the Fifth Workshop of Spanish Scientific Association of Applied Economy on Distribution Models Theory held in Granada (Spain) in September 2005. The contributions offer a must-have point of reference on models theory. This book has been selected for coverage in: Index to Scientific & Technical Proceedings® (ISTP®/ISI Proceedings) Index to Scientific & Technical Proceedings (ISTP CDROM version/ISI Proceedings)  
*Sample Chapter(s)*  
Chapter 1: Modeling Income Distributions
