the word : the diffusion of American conservatism in Europe and beyond / by Steven Teles and Daniel Kenney -- Work, welfare, and wanderlust : immigration and integration in Europe and North America / by Randall Hansen -- Lost in translation : the transatlantic divide over diplomacy / by Daniel W. Drezner -- The Atlantic divide in historical perspective : a view from Europe / by Laurent Cohen-Tanugi.

Sommario/riassunto

Many thought the 21st century would witness political, economic and even ideological convergence amongst the countries of the West. This has not happened. Today we see America 'growing apart' from her democratic allies and neighbors. Growing Apart shows how the social, political, and economic forces shaping advanced democratic states are pushing America in different directions from the rest of the democratic world and argues that these changes are not the product of any particular president or government. This volume brings together a set of leading scholars who each examine the evolution of different social, political, and economic forces shaping Europe and America. It is the first book to unite the international relations scholarship on transatlantic relations with the comparative politics literature on the varieties of capitalism. Taken together, the essays in this volume address whether the 'West' will continue to remain a coherent entity in the 21st century.
