Sommario/riassunto	This is a unique and delightfully engaging account by a leading tropical biologist of doing science at one of the last wild frontiers in the world. Vojtech Novotny is a highly respected Czech scientist. His widely cited work, of profound importance to ecology and evolution, is not done, like much modern science, in a lab full of gleaming apparatus. Instead, he chose as his 'laboratory' the remotest parts of Papua New Guinea, where he has established a research station. Supported by a team of Papuans whom he has trained up so that they can combine their wide and intimate knowledge of the plants
