

1. Record Nr.	UNINA9910778331603321
Titolo	Framework for implementing integrated vector management (IVM) at district level in the South-East Asia region [[electronic resource]] : a step-by-step approach
Pubbl/distr/stampa	Washington, D.C., : World Health Organization, 2008
ISBN	1-282-27400-7 9786612274008 92-9022-348-0
Descrizione fisica	1 online resource (28 p.)
Disciplina	614.432
Soggetti	Vector control - Southeast Asia
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	COVER; TITLE; Contents; Copyright; Glossary of terms; 1. Introduction; 2. Policies in Support of Vector Control; 3. District IVM Planning Cycle; 4. References; 5. List of Contributors
Sommario/riassunto	Integrated vector management (IVM) is one of the key elements of the Revised Malaria Control Strategy of the SEA Region. The technical, managerial and operational capacities of district-level managers are inadequate or too weak to understand, plan, and implement components of an IVM approach at district and sub-district levels. Intersectoral partners are usually aware of their roles in vector management, as well as operational and managerial mechanisms for taking synergistic actions. This framework for implementing IVM at the district level provides step-by-step guidance to develop and impleme
