Sommario/riassunto Some of humankind's greatest tools have been forged in the research laboratory. Who could argue that medical advances like antibiotics. blood transfusions, and pacemakers have not improved the quality of people's lives? But with each new technological breakthrough there comes an array of consequences, at once predicted and unpredictable, beneficial and hazardous. Outcry over recent developments in the reproductive and genetic sciences has revealed deep fissures in society's perception of biotechnical progress. Many are concerned that
