

1. Record Nr.	UNINA9910778374703321
Autore	Widmer Randolph J
Titolo	The evolution of Calusa : a nonagricultural chiefdom of the southwest Florida coast / / Randolph J. Widmer
Pubbl/distr/stampa	Tuscaloosa : , : University of Alabama Press, , 1988 ©1988
ISBN	0-8173-8099-X
Descrizione fisica	1 online resource (xv, 334 pages) : illustrations, maps
Disciplina	975.9/01 975.901
Soggetti	Human ecology - Florida - History Calusa Indians Paleoecology - Florida Florida Antiquities
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di bibliografia	Includes bibliography and index. Includes bibliographical references and index.
Nota di contenuto	Cover; Contents; List of Tables; List of Figures; Preface; Introduction; Theoretical and Methodological Considerations in a Study of Coastal Adaptation; The History of Archeological Research in Southwest Florida; The Prehistory of Southwest Florida; The Environment and Ecology of Southwest Florida; The History of Environmental Change in South Florida; A Dynamic Model of the Prehistoric Coastal Adaptation in Southwest Florida; The Subsistence and Settlement Characteristics of the Calusa Adaptation; The Sociopolitical Evolution of the Calusa Chiefdom; Summary and Conclusions; References Cited Appendix: Radiocarbon Determinations for the Middle and Late Holocene Sea-Level Position Index
Sommario/riassunto	The aims of this study are twofold: compile, for the first time, all the archaeological, environmental, and geological data pertinent to the evolution of the aboriginal inhabitants of southwest Florida; and, using this basis, develop a specific, integrated, and dynamic model of cultural adaptation that will serve as a stimulus for hypotheses that go beyond simple culture-historical concerns for future archaeological research in

this region.
