 Old Coptic Script -- Index of Key Content -- Plates

Sommario/riassunto

This volume provides the first comprehensive text edition of the
 Egyptian language sections of P. Bibliothèque Nationale Supplément
 Grec. 574 (PGM IV) and analysis of their script, language, and the
 bilingual spells which they are part of. The magical practices preserved
 in the PDM and PGM have been published for nearly a century, yet it is
 only recently that research has focused on investigating the complex
 relationship between the languages, scripts, and religious traditions
 they exhibit, as well as the question of who composed, copied, and
 practiced these spells. Focusing on the bilingual divinations, lust spell,
 and exorcism of PGM IV, written in the Egyptian and Greek languages -
 and rendered in Old Coptic scripts and the Greek script respectively -
 this volume analyses their textual content and ritual mechanics,
 contextualised among the PDM and PGM, and investigates the potential
 identities of the magical practitioners of late Roman and Late Antique
 Egypt. Encompassing the disciplines of Egyptology, Coptology,
 Papyrology, and Late Antique studies, this volume focuses in particular
 on the themes of magical practice, bilingualism, script, and the social
 context of magic in Egypt during the 2nd to 4th centuries CE.

theory; NOTES; REFERENCES; INDEX; back cover

Sommario/riassunto

Badcock sets out a radical new theory of the mind based on the recent discovery of genomic imprinting. He uses psychiatric case material to show how many of the symptoms of psychosis can be shown to be the mental mirror-images of those of autism. This new theory casts intriguing new light on topics such as the nature of genius.
