Power and Energy Systems III; Preface, Committees and Sponsors; Table of Contents; Chapter 1: Research and Design of Machinery in Energy Industry and Energy Technologies for Industry; Prediction of Vehicle Fuel Consumption Model Based on Artificial Neural Network; DeNOx Technology Selection and Optimal Design of SNCR System for a 300MWe CFB Boiler; Design and Development of 850t/h CFB Boiler with Energy Saving Technology; Evaluation the Role of Multi-Stage Compression and Waste Heat Recovery on Compressed Air Energy Storage System Performance
Appropriate Electric Energy Conservation Measures for Big Mosques in Riyadh City
Bayesian Algorithm Based on Airborne Power Supply System; Study on the Cooling System of Super-Capacitors for Hybrid Electric Vehicle; A Charging Management of Electric Vehicles Based on Campus Survey Data; Back-EMF Position Detection Technology for Brushless DC Motor; Stress State of Turbine Blade Root and Rim Considering Manufacturing Variations; Analysis on a Gas Turbine Sealing Disk Structure and Material Strength; A Kind of Adjustable Electric Heating Pipe Power Electrode Preparation Equipment
Fracture Failure Mechanism Analysis of LP Second Stage Blades of a Gas Turbine
Effect of Temperature Cycling on Stress Relaxation Behavior of Electrical Connector Contacts; Loss Analysis and Calculation Method of the Switched Reluctance Motor; Research on Characteristics of Variable Pitch Offshore Wind Turbine; Analysis of Plastic Optical Fiber Based Daylight System Suitable for Building Applications; Design and Performance of Horizontal Axis Wind Turbine Using Blade Element Momentum Theory (BEMT)
Optimization of Multi-Pole Permanent Magnet Synchronous Generator Based 8 Blade Magnetically Levitated Variable Pitch Low Speed Vertical Axis Wind Turbine
Effects of Double Glazing on the Performance of a Solar Thermal Collector; Extended Modulation Index with more Eliminated Low Order Harmonics at Cascaded Multilevel Inverters; Thermal Structure Analysis and Optimization of the Feeding System of the Permanent Magnet Linear Synchronous Motor; Experimental and Validation of Photovoltaic Solar Cell Performance Models in Desert Climate
Simulation on Building Energy Consumption for a Residential Building
An Estimation Strategy of Lithium Battery SOC Based on Gauss-Hermite Filter; Chapter 2: HV Power Lines Technologies; Research on Prediction Model of Discharge Voltage under High-Altitude Condition Based on BP ANN; Test Research on Phase-to-Ground Air-Gap Discharge Characteristics of UHV Substation; The Simulation Study of Transformer Inductive Oscillating Switching Impulse Voltage Generation; Research on the Failure Prediction of Electrical Connectors at High Temperature
Research on an Accident of 500 kV Gas Insulated Transmission Line

Collection of selected, peer reviewed papers from the 2013 3rd International Conference on Power and Energy Systems, November 23-24, 2013, Bangkok, Thailand. The 106 papers are grouped as follows: Chapter 1: Research and Design of Machinery in Energy Industry and Energy Technologies for Industry; Chapter 2: HV Power Lines Technologies; Chapter 3: Innovative Materials and Chemical Technologies for Power Industry and Energy Systems; Chapter 4: Innovative Design, Engineering Management and Automation of Modern Energy Systems

Sommario/riassunto	"The birth of experience goes on all life long. Giving birth to oneself involves many processes. The first chapter of this book expands on Eigen's final talk on "Psychoanalysis and Kabbalah" for the New York University Postdoctoral Contemplative Studies Project, and focuses in particular on an intertwining of beauty and destruction. Beauty is the heart of the Kabbalistic Tree of Life, intricately linked both to other capacities and to catastrophic devastation. Interestingly, Bion also links faith and catastrophe, and writes of psychoanalytic "beauty", thereby creating a rich dance of psychoanalysis with Kabbalah. Winnicott adds his own special touch, associating the fate of a vital spark with trauma as the personality begins to form, and with the work of spontaneous recovery that is a profound part both of living and of therapy sessions. The second part of the book is new and focuses on birth processes at different ages and situations, exploring in detail how psychoanalysis interweaves with themes from life, clinical work, and Kabbalah. Failed birth processes are part of living but so is the need to "midwife" existence. Eigen suggests that there may be some kind of "organ" that permeates, scans, and tastes shifting centers of experience, taking note

of their fate and partnering their development - a kind of inner tuning sense in search of cultivation, spanning what we call conscious and unconscious life, mind and body, and testing the weather for favorable birth conditions. Often we do not know exactly what is happening or how, but sense something germinating. Domains open that are not confineable or restricted by the tools at hand - which is perhaps one reason why analysts are called toolmakers, as experience and the tools used to understand it become part of further birth processes. In this way, Eigen shows how the intimate fusion of psychological and spiritual currents generate new tastes of living."--Provided by publisher.
