

1. Record Nr.	UNINA9910778569303321
Autore	Kegan Robert
Titolo	The evolving self : problem and process in human development // Robert Kegan
Pubbl/distr/stampa	Cambridge, Mass. : , : Harvard University Press, , 1982
ISBN	0-674-25483-X 0-674-03941-6
Descrizione fisica	1 online resource (336 pages) : illustrations
Disciplina	155.2/5
Soggetti	Developmental psychology Personality change Self Meaning (Psychology) Psychotherapy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [299]-307) and index.
Nota di contenuto	Contents ; Prologue ; Part One: Evolutionary Truces ; One: The Unrecognized Genius of Jean Piaget ; Two: The Evolution of Moral Meaning-Making; Three: The Constitutions of the Self; Part Two: The Natural Emergencies of the Self; Four: The Growth and Loss of the Incorporative Self ; Five: The Growth and Loss of the Impulsive Self ; Six: The Growth and Loss of the Imperial Self ; Seven: The Growth and Loss of the Interpersonal Self ; Eight: The Growth and Loss of the Institutional Self ; Nine: Natural Therapy ; References; Index
Sommario/riassunto	The Evolving Self focuses upon the most basic and universal of psychological problems—the individual's effort to make sense of experience, to make meaning of life. According to Robert Kegan, meaning-making is a lifelong activity that begins in earliest infancy and continues to evolve through a series of stages encompassing childhood, adolescence, and adulthood. The Evolving Self describes this process of evolution in rich and human detail, concentrating especially on the internal experience of growth and transition, its costs and disruptions as well as its triumphs. At the heart of our meaning-making activity, the book suggests, is the drawing and redrawing of the

distinction between self and other. Using Piagetian theory in a creative new way to make sense of how we make sense of ourselves, Kegan shows that each meaning-making stage is a new solution to the lifelong tension between the universal human yearning to be connected, attached, and included, on the one hand, and to be distinct, independent, and autonomous on the other. The Evolving Self is the story of our continuing negotiation of this tension. It is a book that is theoretically daring enough to propose a reinterpretation of the Oedipus complex and clinically concerned enough to suggest a variety of fresh new ways to treat those psychological complaints that commonly arise in the course of development. Kegan is an irrepressible storyteller, an impassioned opponent of the health-and-illness approach to psychological distress, and a sturdy builder of psychological theory. His is an original and distinctive new voice in the growing discussion of human development across the life span.
