

1. Record Nr.	UNINA9910778652603321
Titolo	Fluid resuscitation : state of the science for treating combat casualties and civilian injuries / / Andrew Pope [et al.] ; Institute of Medicine
Pubbl/distr/stampa	Washington, D.C. : , : National Academy Press, , 1999
ISBN	0-309-17279-9 1-280-18596-1 9786610185962 0-309-59701-3 0-585-08494-7
Descrizione fisica	1 online resource (207 pages) : illustrations
Altri autori (Persone)	PopeAndrew MacPherson <1950->
Disciplina	617.2/1
Soggetti	Hemorrhagic shock - Treatment Fluid therapy Resuscitation Medicine, Military First aid in illness and injury
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (p. 125-156) and index.
Sommario/riassunto	The challenges associated with immediate resuscitation of the wounded soldier are daunting and often unappreciated by civilian medical personnel. When you consider that field medics frequently work in less than friendly field conditions, exposed to the elements, while carrying only limited medical gear, potentially under fire, you get a sense for the extraordinary obstacles that must be overcome. Which technologies are best suited to this situation? What are the most promising research directions?
