Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This publication by the International Atomic Energy Agency (IAEA) focuses on stakeholder engagement in nuclear programmes. It highlights the importance of involving various stakeholders in the decision-making processes related to nuclear facilities and technology. The book aims to enhance public confidence and improve communication among key organizations involved in nuclear programmes. It provides guidance and examples of good practices in stakeholder engagement across the lifecycle of nuclear facilities, including reactors and the nuclear fuel cycle. The intended audience includes policymakers, nuclear industry professionals, and those interested in the management and planning of nuclear power plants.
