-- IVF birth data presentation : its impact on clinical practice and patient choice / Emily Jackson and Hossam Abdalla.

Sommario/riassunto

"This multi-disciplinary collection of essays from the Cambridge Socio-Legal Group is concerned with the varying circumstances, manner, timing and experiences of birth. It contains essays from a wide range of disciplines including law, medicine, anthropology, history and sociology, examining birth from the perspectives of mother, doctor, midwife and father. Questions considered in the book include: who has power during the birthing process? How has the experience of birth changed over time? Should birth mark a significant change in the legal status of the foetus? What is the proper role of birth registration? What role, if any, do fathers have in the birthing process? What legal rights should the woman have to refuse treatment during the birthing process? What is the significance of changes of the age at which women give birth? This stimulating collection of papers provides new insights into one of life's most momentous moments."--Bloomsbury Publishing.
